## Develop The Web Application Using Node-RED

**Team ID:PNT2022TMID46762** 

**Aim**: Develop the web application using **Node**-REDSteps Followed:

•

- Opened a Node-RED project
- Added code to get child location in python

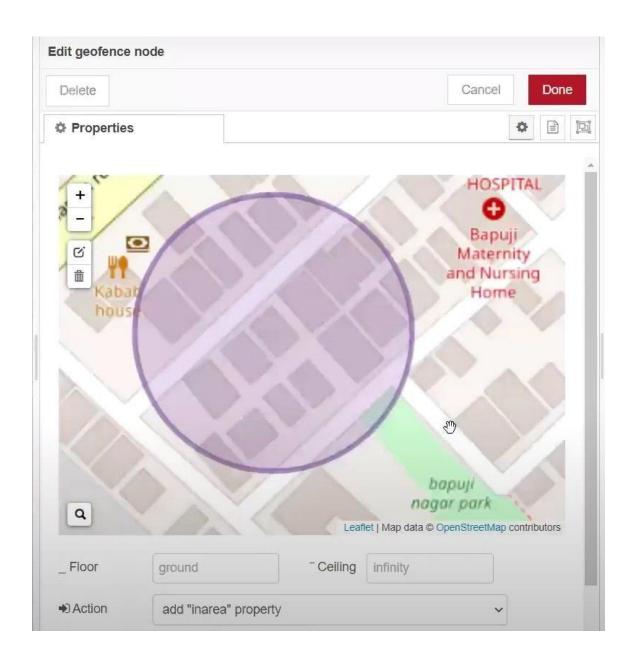

```
import json
import wiotp.sdk.device
import time

myConfig = {
    "identity": {
        "orgId": "hj5fmy",
        "typeId": "NodeMcC",
        "deviceId": "12345"
},
    "auth": {
        "token": "12345678"
}
}
client = wiotp.sdk.device.DeviceClient(config=myConfig, logHandlers=None)
client.connect()

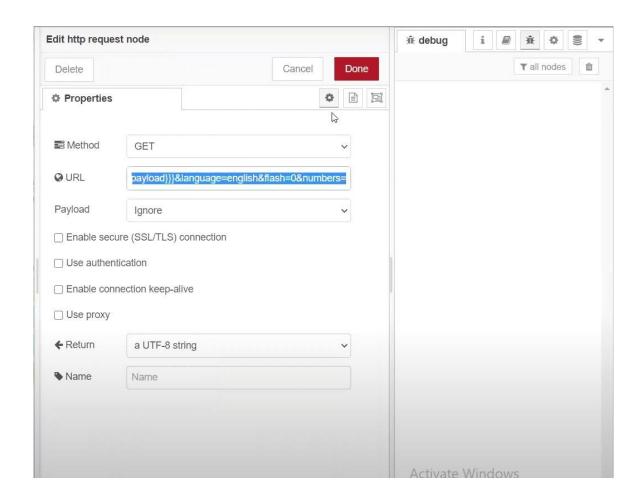

Thile True:
    name= "Smartbridge"
    #in area location
    latitude= 17.4225176
    longitude= 78.5458842
    #out area location

#latitude= 17.4219272
#longitude= 78.5488783
    myData=('name': name, 'lat':latitude, 'lon':longitude)
    client.publishEvent(eventId="status", msgFormat="json", data=myData, qos=0, onPublish=None)
    print("Data published to IBM IoT platfrom: ",myData)

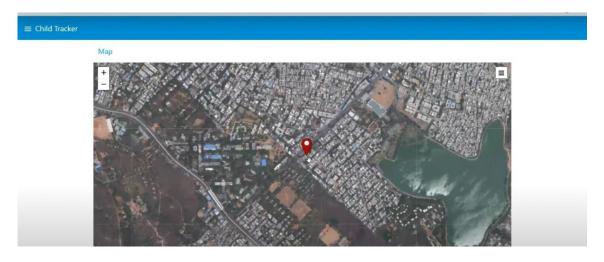

time.sleep(5)
client.disconnect()
```

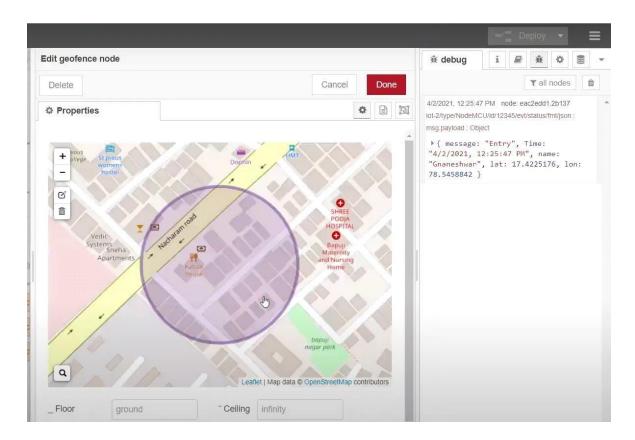

Created the GeoFence

Editing the HTTP Request URL

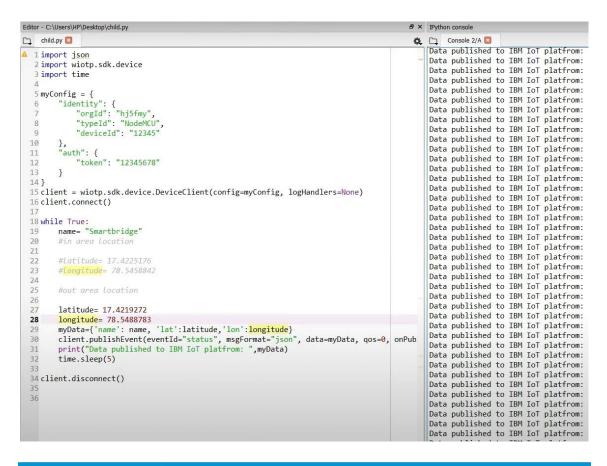

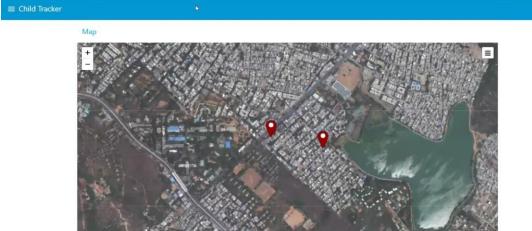

Located the child

Created the geofence node

Python script sending requests to IBM Cloud

After running the script, the web UI shows "Person is not in theparticular area"

Result: Successfully developed the web application using Node-RED
